

Make a Roman Snake Bracelet

You will need a cardboard tube, crayons or paint. Some shiny paper or card to stick on. Jewels or beads will work too.

Start by drawing a line all the way around your tube and another one next to it. Leave a small gap between the lines.

At one end of your tube, draw an almond shape. This will be your snake's head.

Cut along the lines carefully to make your snake. Once you have cut out your snake you can decorate it and make it look very expensive.
