

NORTH

**Notes**

1. This map shows those areas where there is an increased potential for groundwater to rise sufficiently to interact with the ground surface and is based on the areas susceptible to groundwater (ASIGW) data, which may be subject to further analysis in the future. Further information on the mapping is provided on the Environment Agency website: [www.gov.uk/government/organisations/environment-agency](http://www.gov.uk/government/organisations/environment-agency).
2. Such groundwater rise could lead to the following:
  - Flooding of basements of buildings below ground level;
  - Flooding of buried services or other assets below ground level;
  - Inundation of farmland, roads, commercial, residential and amenity areas;
  - Flooding of ground floors of buildings above ground level; and
  - Overflowing of sewers and drains.
3. Areas not shown to be at risk of groundwater should be considered to have a low potential of groundwater flooding.

**Intended Use**  
 This map is intended to provide a strategic overview of groundwater flood risk and should not be used to assess flood risk for individual properties or infrastructure.
