Subject: 20/01242/FULM - Halloughton Solar Array

I have copied in this address on an email about the most recent site plan I sent to the applicants representative. At the moment I wish to object on behalf of Notts Ramblers because the latest plan shows only part of the unregistered footpath at Halloughton and does not make clear how it is related to the gates they want install. at the junction with the public road.

To be clear about this I am considering only the physical rights of way issues and separate comment other issues, such as landscape will be made by James McGill.
